

Senior Project Manager

ID Quantique (IDQ) is the world leader in quantum technologies with applications in the field of sensing and security. IDQ is organized in two business units. In its Quantum-Safe business unit, IDQ develops and commercializes cryptographic solutions, designed to protect data for the long-term future against threats such as quantum computing. The company provides quantum-safe network encryption, secure quantum key generation and quantum key distribution solutions, as related services to the financial industry, enterprises and government organizations globally. In its Quantum Sensing business unit, the company develops and commercializes optical instrumentation products.

As the world leader in quantum technologies, IDQ is a fast-growing company, creating new activities in new markets, worldwide. Following a major investment in early 2018 by SK Telecom, Korea's largest telecom operator, and to support the growing resultant commercial and operational needs, IDQ is looking for a Senior Project Manager in addition to the newly established department named PPMO. This additional position is created to ensure proper and timely execution of projects across the whole company (cross-department, cross-locations) and drive our project and product lifecycle.

Key Functions and Responsibilities:

- Develop and deploy, companywide, project management best practices and methodologies.
- Collaborate with Senior Product Manager to develop and deploy, companywide, Product Management best practices and methodologies.
- Define, deploy and control project management tools for schedule, budget and risk management and reporting.
- Manage the project portfolio and define relevant key performance indicators to allow the management team to prioritize and anticipate the work load.
- Follow the project portfolio progress with respect to the strategic roadmap and inform stakeholders of the progress.
- Support and coach project/technical leaders in project management activities when necessary.
- Develop a Project Management plan, strategy and training program in-line with the best practices, methodologies and resource development.
- Lead high priority projects as Senior Project manager
- Contribute to the company strategy, roadmap definition and management as a member of the strategic leadership team.
- Support all IDQ departments in their operational needs and challenges based on a continuous improvement philosophy to drive operational excellence company wide.
- Lead an ERP Implementation project across the company worldwide.

Desired Profile:

- A strong technical background with a Bachelor's or Master's Degree in Engineering or in a relevant field such as; Software, Electronics or Physics.
- A minimum of 10 years of experience in a dynamic technical environment.
- A proven track record for success in a leadership role demonstrating a capacity to manage, motivate and communicate effectively.
- A demonstrated experience as a Senior project responsible for delivering commercial solutions.
- Strong stakeholder management skills: experienced in managing multiple stakeholders at the management level.
