

Senior Project Manager

ID Quantique (IDQ) is the world leader in quantum technologies with applications in the field of sensing and security. IDQ is organized in two business units. In its Quantum-Safe business unit, IDQ develops and commercializes cryptographic solutions, designed to protect data for the long-term future against threats such as quantum computing. The company provides quantum-safe network encryption, secure quantum key generation and quantum key distribution solutions, as related services to the financial industry, enterprises and government organizations globally. In its Quantum Sensing business unit, the company develops and commercializes optical instrumentation products.

As the world leader in quantum technologies, IDQ is a fast-growing company, creating new activities in new markets, worldwide. Following a major investment in early 2018 by SK Telecom, Korea's largest telecom operator, and to support the growing commercial and operational needs, IDQ is looking for a Senior Project Manager to drive technical projects from definition to full delivery.

Key Functions and Responsibilities:

- Manage key engineering projects across departments using adequate project management methodology (Agile or Waterfall)
- Lead the presales/definition phase by establishing a clear baseline of requirements and a pre-approved acceptance plan
- Develop a Project Management plan, strategy and training program in-line with the best practices, methodologies and resource development.
- Ensure proper execution by monitoring the progress according to the approved plans
- Collaborate with various departments and stakeholders to streamline communication and establish a clear sense of ownership
- Strive to deliver projects on spec, cost and quality
- Suggest and deploy, companywide, project management best practices and methodologies.
- Define, deploy and control project management tools for schedule, budget and risk management and reporting.
- Support and coach technical leaders in project management activities when necessary.
- Support all IDQ departments in their operational needs and challenges based on a continuous improvement philosophy to drive operational excellence company wide.

Desired Profile:

- A strong technical background with an Engineering degree in Physics, Electronics, computer science or equivalent.
- An proven experience of project management/delivery of 5 years in a relevant industry (in particular in Security, embedded software or Optical products).
- A minimum of 8 years of experience in a dynamic technical environment.
- A proven track record for success in a leadership role demonstrating a capacity to manage, motivate and communicate effectively.
- Strong stakeholder management skills: experienced in managing multiple stakeholders at the management level.
- Experience with industrial processes and manufacturing a plus.
- Very good English, oral and written, a must
